

## Dosage Chart

Recommended dosage based on the dog's body weight, to be given twice daily and at least one hour before feeding.

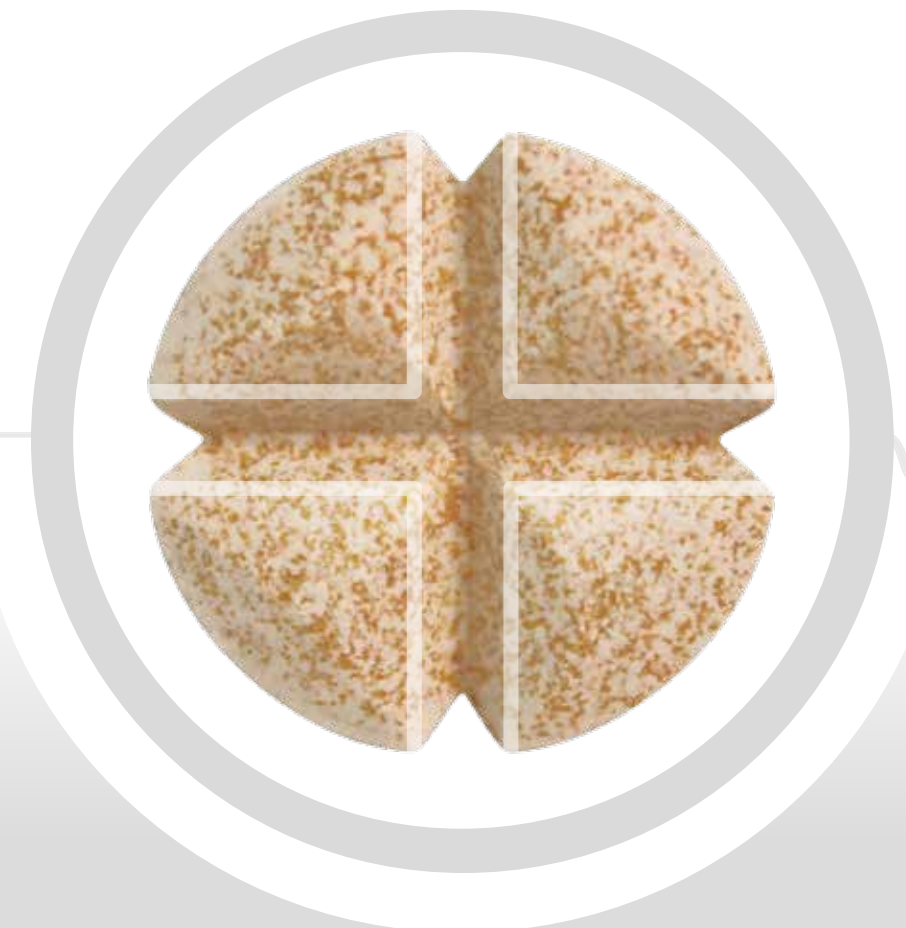

Body Weight	Daily dose at 0.5 mg/kg	Morning Tablet	Evening Tablet
5 kg	2.5 mg		
10 kg	5 mg		
15 kg	7.5 mg	 	 
20 kg	10 mg	 	 
25 kg	12.5 mg	  	  
30 kg	15 mg	  	  
35 kg	17.5 mg	   	   
40 kg	20 mg	   	   

The dose range is 0.2-0.6 mg/kg body weight per day with the preferable dose being 0.5 mg/kg body weight per day divided into two doses.

All tablets shown to actual size.

# Cardisure®

## Pimobendan

*...just better*

Cardisure® is bioequivalent to the leading brand but offers added benefits:- the flavoured, divisible, blister packed tablets are available in multiple strengths, to enable accurate and flexible dosing, coupled with competitive pricing.

Treatment with pimobendan at the onset of clinical signs of CHF is recommended in guidelines by the American College of Veterinary Internal Medicine. **Cardisure®** ..... It's pimobendan, **just better.**

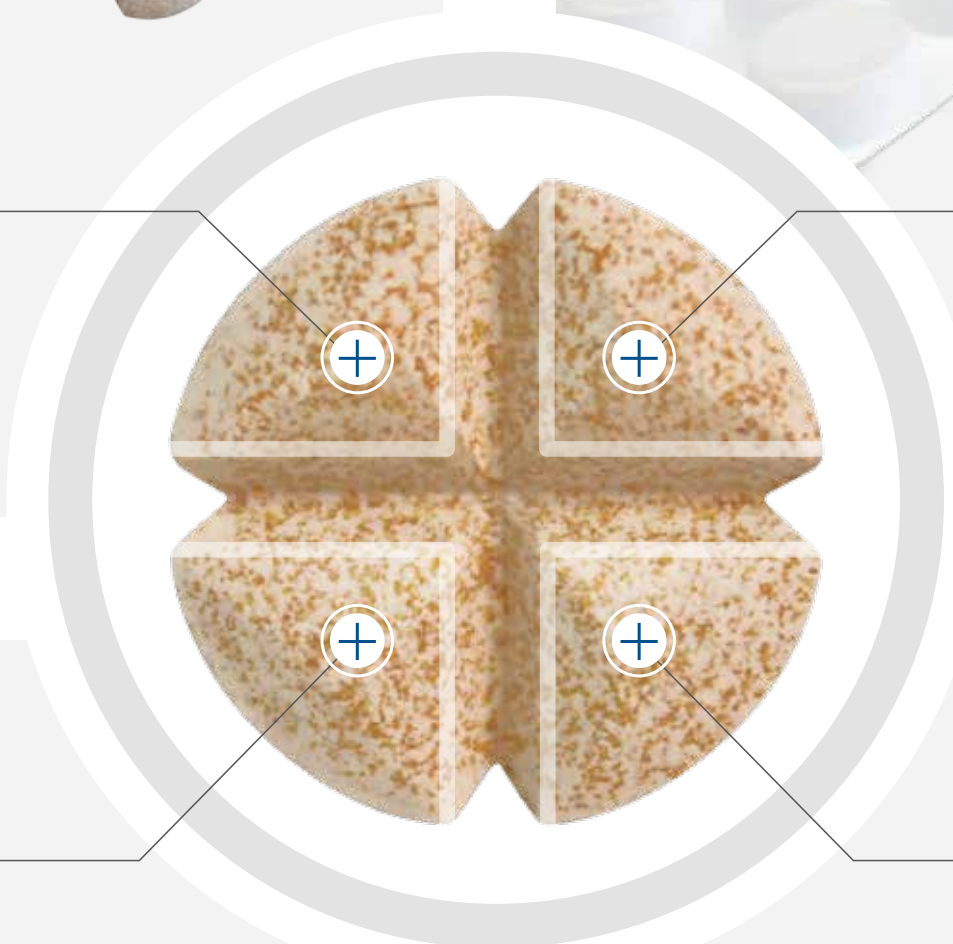

### Better tablet divisibility

Cardisure® tablets are deep scored making them easy to divide, enabling accurate and flexible dosing.

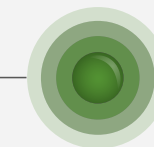

### Blisters for better dispensing

Cardisure® tablets come in blister packs which are quick and easy to dispense. Blisters of 10 tablets give you dispensing options without the need to count pills.

### Better flavouring

Cardisure® tablets have a natural yeast flavouring to encourage acceptance, making administration easy, with a low risk of allergy.

### Multiple strengths

Cardisure® tablets come in multiple strengths for dogs of all shapes and sizes.
